

**“ULCERATIVE COLITIS
shouldn't be
such a BIG part
of my life.”**

**If living with
ulcerative colitis
has become a daily
struggle, consider
participating
in this clinical
trial evaluating
an investigational
medication.**

**To learn more, please contact:
Medical Research Center of Connecticut
(203) 281-5161**

Current ulcerative colitis (UC) medications often cause unwanted side effects. Now, local doctors are hoping to determine if the investigational medication in this study can effectively treat UC with fewer side effects than current medications.

**To participate in this study,
you must:**

- Be 18–80 years of age,
- Have been diagnosed with moderate to severe UC at least six months before study enrollment, AND
- Not have adequate relief of your UC symptoms with current or past UC treatments.

Qualified participants will receive study medication and study-related medical evaluations at no cost.
